NEW QUESTION 152

You are creating a Power Automate flow. The flow must read each item in a Microsoft SharePoint list that details sales opportunities and set the value for a field named Status to Overdue if the value of a field named Follow up is less than or equal to the current date. You need to select the appropriate component to cycle through the entire list. Which component should you use?

- A. Connector
- B. Action
- C. Trigger
- D. Condition

Answer: A

NEW QUESTION 153

A company uses Power Apps canvas apps. When a user opens Power Apps Studio in a browser and selects Apps I can edit, they do not see an app that they need to modify. You need to determine why the user cannot see the app. What are three possible reasons? (Each correct answer presents a complete solution. Choose three.)

- A. The user selected an incorrect Power Apps environment.
- B. The user has not been granted the System Customizer role.
- C. The user has not been set as the app co owner.
- D. The app has not been shared with the user.
- E. The environment does not have a Common Data Service database.

Answer: ACD

Explanation:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/edit-app>

NEW QUESTION 154

You are a sales manager for a large retail organization. You are creating a Power Apps app that will display customer product purchase information from your old point-of-sale (POS) system and need to link those sales to the customer accounts and product sales in Dynamics 365 Commerce. You need to use the appropriate component. What should you use?

- A. business process flow
- B. business rule
- C. common data service

D. entity metadata

Answer: C

NEW QUESTION 155

A company is building apps to support their business operations. The apps will use connectors to access data from several data sources and respond to a number of events generated by components. Which two operations can you use for connectors? (Each correct answer presents part of the solution. Choose two.)

- A. Triggers
- B. Plug-ins
- C. Actions
- D. Gateways

Answer: CD

NEW QUESTION 156

A company uses Dynamics 365 Supply Chain Management. When a sales order is created for one of the customers that a specific user manages, a Microsoft Outlook task must be created to remind the user to perform any follow up activities that are required. You need to implement the functionality to create Outlook tasks. Which feature should you use?

- A. Power Automate
- B. AI Builder
- C. Power BI
- D. Business Events
- E. Common Data Service

Answer: A

NEW QUESTION 157

Hotspot

A company is evaluating ways to connect Power Platform apps to external services to perform complex activities. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Answer Area

Statement	Yes	No
