- A. You can display related data from Dynamic 365 Customer Engagement and Excel in the same Power BI report.
- B. You cannot display related data from Dynamic 365 Customer Engagement and Excel in the same Power BI report.

Answer: B

NEW QUESTION 137

Your company uses Dynamics 365. When a service ticket is created, a technician visit to the customer is required. Technician visits should be consented to by a manager. You need to ensure that the process is followed. What should you use?

- A. Scheduled flow
- B. Business rule
- C. Approval flow
- D. Button flow

Answer: C

NEW QUESTION 138

You are the Power Platform administrator in your company. You want to create new users and

manage their license assignment. You need to use the appropriate admin center to perform these tasks. What should you use?

- A. Microsoft 365 admin center
- B. Power Apps admin center
- C. Power Platform admin center
- D. Dynamics 365 admin center

Answer: A

NEW QUESTION 139

You plan to use Power Automate to perform data-management tasks when users interact with sales opportunities in Dynamics 365. You need to identify the three types of events that can generate a trigger for the tasks. Which three types of events should you identify? (Each correct answer presents a complete solution. Choose three.)

- A. when a record is displayed in a view
- B. when a record is deleted
- C. when a record is created
- D. when a record is updated
- E. when a record is read

Answer: BCD

Explanation:

Triggers like When a record is created, When a record is updated, and When a record is deleted initiate your flow within a few minutes of the event occurring. In rare cases, your flow can take up to 2 hours to trigger.

<https://docs.microsoft.com/en-us/power-automate/connection-dynamics365>

NEW QUESTION 140

You use Power Automate for personal productivity. You often overwrite working flows by editing the definitions. You are unable to undo changes after saving a flow. You need to be able to revert a flow to the current state. Which two options can you use? (Each correct answer presents a complete solution. Choose two.)

- A. Export
- B. Rename
- C. Save As
- D. Share

Answer: AC

Explanation:

A: You can export a flow as a package and import it into a different environment, or use it to restore the in the same environment at a later point in time.

C: The ability to make a copy of your flow is often useful when you want to create a flow similar to something you've already created. Or, if you want to maintain a draft of your working flow as you work on adding more functionality.

NEW QUESTION 141

You use Power Automate to create a flow that automatically sends email to a project manager when project team members mark a task as complete. Project team members are prematurely marking tasks as complete. Project leads must validate that tasks are complete before an email is sent to the project manager to announce task completion. You need to modify the flow. Which

component should you use?

- A. a process argument
- B. a condition
- C. an expression
- D. a trigger
- E. a solution

Answer: B

Explanation:

Use a condition and set the action to send an email.

<https://docs.microsoft.com/en-us/power-automate/add-condition>

NEW QUESTION 142

A company is using Power Automate to automate business processes. You need to run a flow when a user presses a button in an app. Which trigger type should you recommend?

- A. Power Apps
- B. for a selected row
- C. manually trigger a flow

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/using-logic-flows>

NEW QUESTION 143

You are planning to allow members of your team to test your chatbot. You must ensure this is done in a secure way. A team member named User1 must test the chatbot. You need to ensure that User1 can complete testing. What should you do?

- A. Sign in to the authoring environment as the chatbot author.
- B. Sign in to Microsoft Azure DevOps as the chatbot author.
- C. Sign in to Microsoft Azure DevOps as User1.
- D. Sign in to the authoring environment as User1.

Answer: A

NEW QUESTION 144

Hotspot

NEW QUESTION 145

Hotspot

You need to use Power Apps to meet your company's requirements. What PowerApps feature should use for each task? (To answer, select the appropriate options from the drop-down menus.)

Task	Feature
Create customized apps with full control over the user interface.	☐ Canvas apps ☐ Model-driven apps ☐ Power Apps portals
Create apps for complex business logic involving Common Data Service.	☐ Canvas apps ☐ Model-driven apps ☐ Power Apps portals
Create customer-facing apps that can interact with users.	☐ Canvas apps ☐ Model-driven apps ☐ Power Apps portals

Answer:

Task	Feature
Create customized apps with full control over the user interface.	☐ Canvas apps ☐ Model-driven apps ☐ Power Apps portals
Create apps for complex business logic involving Common Data Service.	☐ Canvas apps ☐ Model-driven apps ☐ Power Apps portals
Create customer-facing apps that can interact with users.	☐ Canvas apps ☐ Model-driven apps ☐ Power Apps portals

Explanation:

1. You should use canvas apps for highly customizable layouts. Canvas apps provide full control over user interface and how screens can interact with each other.
2. You should use model-driven apps for implementing complex business logic. Model-driven apps take care of the user interface part, so you only need to focus on business rules, forms, and views.
3. You should use Power Apps portals for a customer facing website. Power Apps portals allow you to create a customer engagement website using pre-built templates.
